

PSY343H1 L0101

Theories of Psychopathology and Psychotherapy

Fall 2024

Contact Information

Instructors: Dr. Taryn E. Grieder, M.Ed., Ph.D. taryn.grieder@utoronto.ca

Office hours: Before and after class, and by appointment

Teaching Assistant: Jana Galley jana.galley@mail.utoronto.ca

**Special thanks to Dr. Tali Boritz (Assistant Professor at York University), who developed this course

Course information: Lectures Tuesdays at 1 – 4 pm in SS1088. Online assessments and participation will be completed on Quercus. Students will have the opportunity for both in-person and synchronous online office hours to ask questions and clarifications about course content. Students need the ability to read and edit PDFs or Powerpoint slides and use Quercus for submission of most assessments.

Course Description, Goals, and Prerequisites

This course will provide students with a critical review of the core theoretical approaches to psychotherapy and the core principles that have been identified as central to the process of change in psychotherapy. Differences in theories of psychopathology and clinical practice between psychotherapy approaches will be highlighted using case studies. Students will begin to conceptualize cases and identify specific strategies and interventions appropriate for specific clients' issues. Didactic course content will be enhanced with video illustrations of various psychotherapy techniques and approaches to psychotherapy.

Learning Outcomes:

By the end of this course, students should be able to:

1. Describe the history, theoretical foundations, and key features of several major psychotherapies;
2. Contrast specific psychotherapies in terms of treatment targets, goals, and features;
3. Define empirically supported treatments and related concepts in clinical practice and research;
4. Identify several specific pairings of psychological disorders and treatments that have strong evidence bases;
5. Explain the concepts of specific and common factors, and how they relate to empirical treatment research and clinical practice;
6. Identify ethical issues and guidelines related to psychotherapy practice.

Prerequisites:

PSY201H1/ECO220Y1/EEB225H1/GGR270H1/POL222H1/SOC202H1/STA220H1/STA238H1/STA248H1/STA288H1/PSY201H5/STA215H5/STA220H5/PSYB07H3/STAB22H3/STAB23H3/S
TAB57H3, and PSY230H1/PSY230H5/PSYB30H3 or PSY240H1/PSY240H5/PSYB32H3

Exclusion: PSY343H5/PSYC36H3

Note about prerequisites: It is your responsibility to ensure that you have met **all** prerequisites listed in the Psychology section of the A&S Calendar for this course. If you lack any prerequisites, you will be removed. No waivers will be granted.

Course Evaluation/Marking Scheme

Participation - 5% - ongoing

Commentary Assignment - 15%

Review Paper - 20%

Applied Learning Activity 1 - 20%

Applied Learning Activity 2 - 15%

Final Assessment - 25%

Lectures: PowerPoint and PDF slides will be posted before class on the date stated in the course schedule (found below). These slides should be downloaded and/or printed to facilitate with note taking. Please note that if you do not understand a particular concept as it is presented, please ask questions! It is your responsibility to let us know if you do not understand a particular concept or idea.

Any posted lecture recordings and slides are only for the exclusive use of enrolled students, for their personal learning. Lecture recordings and slides are not to be shared in any way beyond enrolled students.

Participation: There will be short reflection assignments given in classes to be completed on Quercus. Students will reflect on a topic covered in class, applying the course material to their response. Students will have at least 24 hours to respond to these discussion questions on Quercus (see the course schedule, below).

Applied Learning Activities: Students will apply concepts from the course material to case studies they are presented with. These case studies will be written materials or videos where the student will analyze the case and apply their knowledge from the course to various questions posed. Further information will be posted on Quercus.

Commentary Assignment: The research commentary assignment is an analysis of a recent original research article (aka experimental study) of the student's choice that examines an issue related to the course (ie. is an experiment that produced new research on therapeutic treatment of psychopathology). Please see the commentary assignment outline for further details, which is available for download on Quercus.

Review Paper: Students will critically review research to write a scholarly paper on the evidence for the pairing of a mental health disorder (e.g., DSM-5 diagnosis such as PTSD) and a specific type of psychotherapy for that diagnosis (e.g., Prolonged Exposure for PTSD). The review paper should be maximum 6 pages long and follow APA formatting guidelines. Please see the review paper outline for further details, which is available for download on Quercus.

Final examination: The in-person final examination will have a combination of multiple choice and written response questions. The written response questions will ask you to think critically about course themes, connect topics in the course, and apply what you have learned to real-world situations. The in-person final examination will be cumulative and will be 3 hours in length.

Course Webpage/Quercus

This course uses the University's learning management system, Quercus, to post information about the course. This includes posting readings and other materials required to complete class activities and course assignments, as well as sharing important announcements and updates. The site is dynamic and new information and resources will be posted regularly as we move through the term, so please make it a habit to log in to the site on a regular basis.

The website associated with this course is accessible via <http://q.utoronto.ca>

SPECIAL NOTE ABOUT GRADES POSTED ONLINE: Please also note that any grades posted are for your information only, so you can view and track your progress through the course. No grades are considered official, including any posted in Quercus at any point in the term, until they have been formally approved and posted on ACORN at the end of the course. Please contact the instructor (and TA) as soon as possible if you think there is an error in any grade posted on Quercus.

Course Policies

Accommodations and Accessibility Needs:

Students with diverse learning styles and needs are welcome in this course. If you have an acute or ongoing disability issue or accommodation need, you should register with Accessibility Services (AS) at the beginning of the academic year by visiting <http://www.studentlife.utoronto.ca/as/new-registration>. Without registration, you will not be able to verify your situation with your instructors, and instructors will not be advised about your accommodation needs. AS will assess your situation, develop an accommodation plan with you, and support you in requesting accommodation for your course work. Remember that the process of accommodation is private: AS will not share details of your needs or condition with any instructor, and your instructors will not reveal that you are registered with AS.

As a student at the University of Toronto, you are part of a diverse community that welcomes and includes students and faculty from a wide range of cultural and religious traditions. For my part, I will make every reasonable effort to avoid scheduling tests, examinations, or other compulsory activities on religious holy days not captured by statutory holidays. Further to University Policy, if you anticipate being absent from class or missing a major course activity (such as a test or in-class assignment) due to a religious observance, please let me know as early in the course as possible, and with sufficient notice (at least two to three weeks), so that we can work together to make alternate arrangements.

Specific Medical Circumstances

If you become ill and it affects your ability to do your academic work, consult me right away. Normally, I will ask you for documentation in support of your specific medical circumstances. This documentation can be an Absence Declaration (via ACORN) or the University's Verification of Student Illness or Injury (VOI) form. The VOI indicates the impact and severity of the illness, while protecting your privacy about the details of the nature of the illness. You can submit a

different form (like a letter from a doctor), as long as it is an original document, and it contains the same information as the VOI. For more information on the VOI, please see <http://www.illnessverification.utoronto.ca>. For information on Absence Declaration Tool for A&S students, please see <https://www.artsci.utoronto.ca/absence>. If you get a concussion, break your hand, or suffer some other acute injury, you should register with Accessibility Services as soon as possible. There may be times when you are unable to complete course work on time due to non- medical reasons. If you have concerns, speak to me or to an advisor in your College Registrar's office; they can help you to decide if you want to request an extension or accommodation. They may be able to provide you with a College Registrar's letter of support to give to your instructors, and importantly, connect you with other resources on campus for help with your situation.

Penalties for Lateness

A penalty of 10% per calendar day, up to and including the last day of classes, will be applied for late assignments. After the last day of classes, the penalty of 10% per calendar day will be applied by the Undergraduate Counselor on behalf of the Department. Any term work that will be handed in after the final day of classes is subject to a petition for extension of term work. This petition should be filed with the student's College Registrar's Office.

Turnitin

Normally, students will be required to submit their course essays to the University's plagiarism detection tool for a review of textual similarity and detection of possible plagiarism. In doing so, students will allow their essays to be included as source documents in the tool's reference database, where they will be used solely for the purpose of detecting plagiarism. The terms that apply to the University's use of this tool are described on the Centre for Teaching Support & Innovation website (<https://uoft.me/pdt-faq>).

Contact

All communication should be sent via University of Toronto email addresses only. Please include "PSY343" in the subject line, and do not send messages through Quercus/Canvas (as they often get filtered as spam/junk). The University requires that all students have a U of T email address and check it regularly; it is the only address to which official university communications will be sent. If you are unable to attend office hours or would like to discuss matters concerning the course directly, please email us to schedule an appointment.

Requesting a Regrade

If you think an assessment has been incorrectly marked, you can request a regrade. In this case, you must first review your assessment with the TA. Following review with the TA, if you wish to have your assessment reviewed by the instructor, please submit a request by email within 2 weeks of the grade return date.

Video recording and sharing (download and re-use prohibited)

Course videos and materials belong to your instructor, the University, and/or other sources depending on the specific facts of each situation and are protected by copyright. Do not download, copy, or share any course or student materials or videos without the explicit permission of the instructor.

For questions about the recording and use of videos in which you appear, please contact your instructor.

Equity, Diversity, and Inclusion

The University of Toronto is committed to equity, human rights and respect for diversity. All

members of the learning environment in this course should strive to create an atmosphere of mutual respect where all members of our community can express themselves, engage with each other, and respect one another's differences. U of T does not condone discrimination or harassment against any persons or communities.

Academic Resources

Writing:

As a student here at the University of Toronto, you are expected to produce well-written assignments. The university provides its students with multiple resources to help them achieve this. For more information on campus writing centres and writing courses, please visit <http://www.writing.utoronto.ca/>.

Academic Integrity and Plagiarism:

All students, faculty and staff are expected to follow the University's guidelines and policies on academic integrity. For students, this means following the standards of academic honesty when writing assignments, collaborating with fellow students, and writing tests and exams. Ensure that the work you submit for grading represents your own honest efforts. Plagiarism—representing someone else's work as your own or submitting work that you have previously submitted for marks in another class or program—is a serious offence that can result in sanctions. Speak to me or your TA for advice on anything that you find unclear. To learn more about how to cite and use source material appropriately and for other writing support, see the U of T writing support website at www.writing.utoronto.ca/. Consult the Code of Behaviour on Academic Matters for a complete outline of the University's policy and expectations. For more information, please see <http://www.artsci.utoronto.ca/osai> and <http://academicintegrity.utoronto.ca/>

Mental Health and Well-being

Your mental health is important. Throughout university life, there are many experiences that can impact your mental health and well-being. As a University of Toronto student, you can access free mental health and wellbeing services at Health & Wellness (<https://studentlife.utoronto.ca/department/health-wellness/>) such as same day counselling, brief counselling, medical care, skill-building workshops, and drop-in peer support. You can also meet with a Wellness Navigation Advisor who can connect you with other campus and community services and support. Call the mental health clinic at 416-978-8030 ext. 5 to book an appointment or visit <https://uoft.me/mentalhealthcare> to learn about the services available to you.

You can also visit your College Registrar to learn about the resources and supports available: <https://www.artsci.utoronto.ca/current/academic-advising-and-support/college-registrars-offices>

If you're in distress, you can access immediate support: <https://uoft.me/feelingdistressed>

Course Outline/Schedule

Every effort will be made to manage the course as stated. However, adjustments may be necessary in these unprecedented times. If so, students will be advised and alterations announced on Quercus prior to implementation.
