

UNDERGRADUATE PSYCHOLOGY

Psychology is the branch of science that focuses on the behaviour of human beings and animals.

Our programs are consistently ranked number one in Canada, and among the top 25 in the world.

Our courses include behavioural neuroscience, clinical science, cognitive psychology, cognitive neuroscience, computational neuroscience, developmental psychology, human and animal learning, perception, personality psychology, psychopathologies, and social psychology.

HOW TO APPLY

High school students interested in psychology should apply to the **Life Sciences** admission category at the St. George Campus. Admission to all psychology programs requires six Ontario Grade 12 U or M courses, including English, Calculus, and Biology or equivalent courses taken outside of the province or at the college or university level.

Students apply to psychology after they have completed their first year of university.

First-year students must take **PSY100: Introductory Psychology** in the Fall or Winter term and exceed the yearly grade requirement outlined in the Arts & Science Calendar to be considered for admission.

All psychology programs have limited capacity and admission is not guaranteed. More information is available on our website.

PROGRAMS

- Minor
- Major
- Specialist
- Research Specialist
- Environment & Behaviour Minor
- Certificate in Psychology of Economics & Management

ABOUT US

The Department of Psychology was established at the University of Toronto's St. George campus in 1927.

The combined expertise of our faculty spans all major areas of psychology and reflects a wide range of approaches to the study of the mind, brain, and behaviour.

Undergraduate students enrolled in our programs learn the fundamental principles of psychology, the various fields within it, and the methods used in psychological research both in the laboratory and in the field.

CAREERS

Psychology graduates can work almost anywhere. Possible career paths can be found in:

- Education
- Healthcare
- Research
- Media and Communication
- Consulting and Management
- Tech and UX Design
- Government
- Human Resources
- Marketing and Sales
- Social Work

Some jobs within these fields may require further studies. Our students have gone on to earn graduate certificates, Master's degrees, and PhDs.

Our students are trained to think critically about human behaviour using a blend of analytical tools, evidence-backed insights, and compassionate understanding. Our teaching and research projects empower students to tackle real-world challenges in healthcare, education, tech settings, and beyond.

Prof. Katherine Duncan, Associate Professor & Associate Chair, Undergraduate
